

ABSTRACT

This Application is one of the finest and helpful platforms for farmers. Farmers can sell their farming equipment's or tools, machines to other farmers with their fare price and other farmers can search for their required items for a fair price and they can contact the seller to buy their items. Admin can view the farming equipment's uploaded by the farmers. Agents are other users of the system. Tractors, harvesters, threshing machines and other agricultural implements and equipment's are available in the custody of agents. Every district has their one agent. This section helps the farmers to contact the agents or the owners of the vehicles directly from nearby locations and book the relevant machinery for their requirements. Owners of the vehicle can update the status of vehicles or equipment's that are available or not. Labour are other users of the system. They can add their services so farmers and buyers can book their services. Farmers can add vehicles and equipment's into cart for future booking. Admin can add and update latest news related to farmers in the form of a notification. The notifications are provided to show the govt schemes and updates about agriculture that are helpful for farmers. There is a report section. Farmers or other users can report system problems in the form of feedback. The admin can view feedback and update the system according to the needs of the users. Agents and farmers can easily Signup to this application by simple steps giving Name, Email and setting a password and by simply Accepting the Terms and Conditions.
